I mostly wanted to check out the excel spreadsheet, thanks. This looks great, just one question - Is there a reason you did not want to put [REDACTED] suggestions in the same table/analysis format as the others?

Subject: Tire Crumb processing facilities contact list

Hi Nicole,

This is the sampling sites list and email I was going to send Jackie, let me know if it looks good.

Hi Jackie,

Please find attached our list of potential crumb rubber manufacturing sites to sample.

From the call with [REDACTED] made the comment that the only cryogenic processing facilities were the [REDACTED] facilities and the [REDACTED] plant. So if we still wanted to get four cryo facilities (as per the draft research protocol) we'd want the [REDACTED] plants (after we confirm with our POC at [REDACTED] if this is indeed the case) and the [REDACTED] one.

Also, has there been any updates on whether the labs can use the crumb rubber samples we collected at the [REDACTED] facilities? If so, then we could potentially use the cryo samples taken at the [REDACTED] plant to avoid being duplicative.
